Website Project Proposal: MindStrong – Mental Health for Young Men

1. Project Title

MindStrong: Mental Health for Young Men

2. Project Overview

MindStrong is a website focused on promoting mental health awareness among young men. The website will provide accessible and easy-to-understand information about mental health, common mental health challenges, warning signs, healthy coping strategies, and ways to seek support.

The website will have a modern, welcoming and user-friendly design. Its purpose is to create a non-judgmental environment where young men can learn more about mental wellbeing and understand that asking for help is a positive step.

3. Target Audience

The target audience is **young men between the ages of 16 and 25**.

The website is aimed at young men who may be experiencing:

- Stress
- Anxiety
- Loneliness
- Low motivation
- Academic pressure
- Relationship problems
- Emotional difficulties
- General challenges with mental wellbeing

4. Website Goals

The main goals of the MindStrong website are to:

- Increase awareness about mental health among young men.
- Encourage young men to take their mental wellbeing seriously.
- Explain common mental health challenges in a simple and understandable way.
- Help users recognise possible warning signs.
- Provide healthy and practical coping strategies.
- Encourage users to talk to trusted people when they are struggling.
- Provide information about professional support.
- Challenge the idea that asking for help is a sign of weakness.

5. Proposed Website Pages

5.1 Home

The Home page will introduce the MindStrong website and explain its purpose.

It will include:

- An introduction to MindStrong.
- Why mental health is important.
- A short message aimed at young men.
- Links to the main sections of the website.
- An overview of what users can learn from the website.

5.2 Understanding Mental Health

This page will explain what mental health and mental wellbeing mean.

It will include information about:

- What mental health is.
- Why mental wellbeing matters.
- Common challenges experienced by young men.
- Stress.
- Anxiety.

- Loneliness.
- Low motivation.
- Academic pressure.
- Relationship problems.
- Common misconceptions about mental health.

5.3 Warning Signs

This page will help users recognise possible changes that may indicate that someone is struggling with their mental wellbeing.

It will cover areas such as:

- Changes in mood.
- Social withdrawal.
- Irritability.
- Changes in sleep.
- Lack of motivation.
- Difficulty concentrating.
- Changes in everyday behaviour.
- When it may be appropriate to seek support.

5.4 Healthy Coping Strategies

This page will provide practical and healthy ways of managing everyday stress and supporting mental wellbeing.

It will include:

- Physical activity.
- Maintaining a healthy routine.
- Getting enough sleep.
- Talking to someone.
- Positive activities.
- Maintaining social connections.
- Managing everyday stress.

5.5 Getting Help

This page will explain the importance of seeking support when someone is struggling.

It will provide information about:

- Talking to someone you trust.
- Speaking to friends.
- Speaking to family members.
- Speaking to a trusted adult.
- Professional support.
- Mental health services.
- Support organisations.
- Emergency or crisis support.

5.6 Enquiry

An additional enquiry page will allow users to submit a general enquiry through a simple form.

The form will include:

- Name.
- Email address.
- Topic.
- Message.

6. Content and Resources

The website will contain:

- Informative written content.
- Relevant images.
- Navigation links.
- Visual elements.
- Support information.
- Information researched from reliable sources.

The content will be written in a simple and accessible manner so that young users can understand the information easily.

7. Website Structure and Technology

The website will use **HTML** to create the structure and content of the pages.

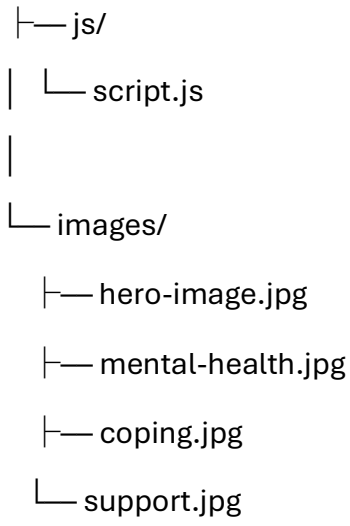

CSS will be used to control the appearance, layout, colours, fonts and responsive design of the website.

JavaScript will be incorporated for interactive functionality where appropriate.

The project files will be organised into separate folders for:

- HTML pages.
- CSS.
- JavaScript.
- Images
